SUBJECT INDEX

Abattoir
Salmonella and *E. coli* O157:H7 prevalence in Mexican beef carcasses, 786
Abiotic surrogate
Tracking cross-contamination in retail delis, 272
Acaricidal activity
Stored food mite and *O. praeteritum*, 1887
Acid
Stress tolerance of *V. parahaemolyticus*, 1456
Acid adaptation
Acid resistance of *L. monocytogenes* during production of Savak cheese, 1801
Acidified foods
Pathogen inactivation in pickled eggs, 1846
Safety of acidified foods, 1245
Acid shock
Sublethally injured *E. coli* recovery, 674
Acid survival
Cross-protection to gastric stress in *Salmonella*, 333
Acriflavine
Biocide susceptibility of *Salmonella* isolates, 653
Acrylamide
Frying instructions as a control measure in restaurants, 462
Active packaging
Antimicrobial packaging for meat storage, 52
Advanced glycation end products
Food-derived N_ε-carboxymethyllysine, 912
Aerobic growth
Aerobic *Campylobacter* growth, 685
Aerobic plate counts
Beef carcass sampling areas, 2069
Aeromonas hydrophila
Influence of glucose concentrations on biofilm of *A. hydrophyla*, 239
Aflatoxin
Fungi and mycotoxins in storage Brazil nuts, 1414
Aflatoxin M_1
Aflatoxin M_1 contamination and dietary risk assessment in China, 849
Agricultural contact water
Fecal indicator organisms and microbial water quality, 967
Agricultural Marketing Service
Safety requirements for USDA ground beef purchase, 523
Alaska
Raw milk and campylobacteriosis in Alaska, 744
Albumen
Salmonella Enteritidis deposition in eggs, 108
Alfalfa sprouts
Behavior of *E. coli* pathotypes on alfalfa sprouts, 1429
PCR detection of *Salmonella* during seed sprouting, 314
Alicyclobacillus acidoterrestris
A. acidoterrestris resistance to sanitizers, 1408
Inactivation of *A. acidoterrestris*, 1041
Alkaline phosphatase
ALP and GGT detection in fluid dairy, 892
Allyl isothiocyanate
Antimicrobial coatings for shell eggs against *Salmonella*, 779
Almond
Aspergillus section *Nigri* species in almonds, 702
Alternaria alternata
Combined inhibitory effect of cassia oil and calcium chloride, 1873
Amendment
Research protocols for soil amendments of animal origin, 1062
Anchovy
Anisakid larvae in *E. encrasicolus* from central Italy, 1643
Anisakidae
Anisakid larvae in *E. encrasicolus* from central Italy, 1643
Anisakid larvae
UV imaging for anisakid larvae, 1288
Antibiotic resistance
Antibiotic resistance in aquaculture products from Guangzhou, 295
Arcobacter isolation from chicken viscera, 879
Chlorine inactivation of *Salmonella* Typhimurium, 1031
Growth of *E. albertii* on raw ground beef, 124
Antibiotics
Quinolone residues in poultry meat, 352
Resistance of *Salmonella* from bulk milk and milk filters, 18
Resistance traits of *E. coli* O157:H7, 6
Antibiotic susceptibility
Characterization and antibiotic susceptibility of *V. vulnificus*, 2063
Antifungal
Antioxidant and antifungal properties of essential oils from Spain, 1218
Antimicrobial activity
Inhibitory effect of cinnamon, 133
Antimicrobial agents
Antimicrobial activities on rosmarinate esters, 1539
Antimicrobial ingredients to control *L. monocytogenes*, 1366
Refined liquid smoke decreased *Listeria* in cold-smoked salmon, 812
Antimicrobial coating
Antimicrobial coatings for shell eggs against *Salmonella*, 779
Antimicrobial properties
Antimicrobial properties of nanodispersed thymol, 440
Antimicrobial resistance
Antimicrobial resistance of *Salmonella* serovars in poultry in Brazil, 2011
Antimicrobial resistance profiles of *E. coli* in broiler chickens, 2045
Antimicrobial-resistant bacteria in raw frozen seafood, 490
Antimicrobial-resistant *E. coli* from beef cattle, 394
Apramycin resistance of *Salmonella* Typhimurium from pigs, 1443
Characterization of *Campylobacter* from poultry carcasses, 1451
Resistance of *Salmonella* from bulk milk and milk filters, 18
Salmonella in butcher shop utensils, 1633
Salmonella in retail ground beef, 2004
Antimicrobials
Antimicrobial resistance in *C. jejuni* from chicken carcasses, 691
Antimicrobial susceptibility
Antimicrobial resistance profiles of *E. coli* in broiler chickens, 2045

Antioxidant
Antioxidant and antifungal properties of essential oils from Spain, 1218
Antioxidant effects
Inhibition of cytotoxicity of Shiga toxin by vegetable extracts, 1733
Apple extract
Plant antimicrobials inhibit *Salmonella* Typhimurium in ground pork, 1264
Apramycin
Apramycin resistance of *Salmonella* Typhimurium from pigs, 1443
Aquaculture
Antibiotic resistance in aquaculture products from Guangzhou, 295
Antimicrobial-resistant bacteria in raw frozen seafood, 490
Arcobacter
Arcobacter isolation from chicken viscera, 879
Arcobacter spp. from Finnish raw milk, 1630
Arcobacter butzleri
Arcobacter spp. from Finnish raw milk, 1630
Arcobacter cryaerophilus
Arcobacter spp. from Finnish raw milk, 1630
Arcobacter spp.
Presence of *Arcobacter* in food products, 1447
Aromatic herbs
Antioxidant and antifungal properties of essential oils from Spain, 1218
Artemisia campestris
Effect of plant extracts on sardine fillets quality, 1719
Aspergillus awamori
Aspergillus section *Nigri* species in almonds, 702
Aspergillus flavus
Heterokaryon self-incompatible *A. flavus* nonaflatoxigenic isolates, 1051
Aspergillus niger
Aspergillus section *Nigri* species in almonds, 702
Aspergillus section *Flavi*
Fungi and mycotoxins in storage Brazil nuts, 1414
Aspergillus section *Nigri*
Powdery mildew increases FB_2 and OTA production in grape berries, 2031
Assessment
Meat freshness identification with artificial intelligence, 1916
Atomic force microscopy
Membrane damage to *E. coli* by egg white, 1523
Attached cell
Effect of bacteriophage against planktonic and attached cells, 2057
Australia
Food safety knowledge, 646
Autoinducer
Characterization of spoilage bacteria, 1350
Autolysin
Controlled lytic systems in *L. casei*, 1187
Automated concentration system
Concentration of bacteria from produce washes, 1152
Avian influenza
Thermal inactivation of HPAIV and vNDV in processed egg products, 640

Bacillus anthracis
Decontamination of *B. anthracis* spores, 699
Bacillus cereus
B. cereus and Caco-2 cells, 820
Modeling the probability of *B. cereus* enterotoxin production, 343
Bacillus cereus spores
Pressure–thermal inactivation of *B. cereus* spores in cooked rice, 616
Bacillus spores
Effects of carbonation, heating, fatty acid esters on *Bacillus* spores, 1568
Bacteria
Produce outbreaks in Canada, 173
Bacterial indicator
Antimicrobial-resistant bacteria in raw frozen seafood, 490
Bacterial injury
Enrichment broth for *Salmonella* recovery, 1963
Bacterial plant pathogens
Pathogenic bacteria control by pesticides, 719
Bactericidal mechanism
Membrane damage to *E. coli* by egg white, 1523
Bacteriocin RC 20975
Purification and characterization of bacteriocin RC 20975, 1575
Bacteriophage
Bacteriophage and produce wash combination, 1336
Effect of bacteriophage against planktonic and attached cells, 2057
Bacteriostatic activity
Effect of modified lysozyme on shelf life of pork, 338
Banding pattern
Food microbe tracker, 283
Beef
E. coli O157:H7 in nonintact beef subprimals, 1778
Beef broth
Thermal tolerance of STEC in beef broth, 1120
Beef carcass
Beef carcass sampling areas, 2069
Beef cattle
Antimicrobial-resistant *E. coli* from beef cattle, 394
C. difficile associated with cattle and ground beef, 256
Differential medium for non-O157:H7 *E. coli*, 192
Beef trim
Method for detection of priority STEC, 1689
Safety requirements for USDA ground beef purchase, 523
Benzalkonium chloride
Biocide susceptibility of *Salmonella* isolates, 653
β-Phenylethylamine
Production of tyramine by *E. faecalis* strains, 854
β-Resorcylic acid
Cattle hide decontamination by natural compounds, 318
Bicarbonate
Aerobic *Campylobacter* growth, 685
Bifidobacterium longum
Probiotics affect virulence of C. *jejuni*, 1740
Bioaccumulation
Norovirus bioaccumulation in oysters, 505
Bioaerosol
Airborne microorganisms in a poultry slaughtering facility, 413
Bioassay
Persistence of *T. gondii* tissue cysts, 1056
Biocides
Antimicrobial tolerance in enterococci, 1806
Biocide susceptibility of *Salmonella* isolates, 653
Characterization of *Salmonella* from low-moisture environments, 1488
Biofilm
A. acidoterrestris resistance to sanitizers, 1408
Biofilm formation and resistance to disinfectant in *L. monocytogenes*, 1179
Characterization of *Salmonella* from low-moisture environments, 1488
Competitive exclusion of *L. monocytogenes*, 601
Native microflora and biofilms, 827
Reduction of *Salmonella* biofilms by essential oils and carvacrol, 205
Salmonella biofilm and relationship to cell characteristics, 1784
Biofilm control
Antibacterial activity of oregano on planktonic and sessile bacteria, 1747
Biofilm formation
Biofilm formation of *S. enterica* serovars, 662
Biofilm inhibition
Influence of glucose concentrations on biofilm of *A. hydrophyla*, 239
Biofumigation
Antifungal compounds from *P. expansum*, 1879
Biogenic amines
C. perfringens in scombrotoxin-forming fish, 1283
Production of tyramine by *E. faecalis* strains, 854
Biological control
Heterokaryon self-incompatible *A. flavus* nonaflatoxigenic isolates, 1051
Bioluminescent imaging
Bioluminescent imaging of *C. sakazakii*, 1359

Biopreservatives
Biopreservatives to control *L. monocytogenes* in fresh salmon, 1463
Bioserotypes
Y. enterocolitica in raw cow's milk, Mexico City, 694
Biothreat agents
Detection of multiple pathogens by PCR-microplate array, 1948
Bisphenols
Bisphenols in commercial milk, 1590
bla$_{CTX-M}$
Plasmids harboring *rmtB-bla*$_{CTX-M}$ in different animals, 2018
Blade tenderization
Fate of *E. coli* O157:H7 in mechanically tenderized prime rib, 405
Blueberries
Traceback of blueberries by using novel data sources, 762
Blue land crabs
Salmonella in blue land crabs, 1270
Blue mozzarella cheese
Molecular characterization of *P. fluorescens*, 500
Boiling
Control of *Salmonella* and *Listeria* in shrimp, 59
Boneless beef
Safety requirements for USDA ground beef purchase, 523
Bootstrap
Costs due to illnesses associated with non-O157 STEC, 945
Botrytis cinerea
Essential oils to control postharvest rots on stone fruits, 631
Bovine colostrum
L. monocytogenes prevalence in bovine colostrum, 248
Bovine feedlot manure
Inactivation of *E. coli* O157:H7 during bovine manure composting, 1308
Brain cysts
Persistence of *T. gondii* tissue cysts, 1056
Brazil nut
Fungi and mycotoxins in storage Brazil nuts, 1414
Brettanomyces
Brettanomyces affected by SO_2 and temperature, 2024
Broiler carcass
Broiler carcass sampling methods, 1330
Broiler chickens
Antimicrobial resistance profiles of *E. coli* in broiler chickens, 2045
Burrata cheese
Microbiological quality of Burrata cheese, 1981
Butcher shop
Salmonella in butcher shop utensils, 1633

Cadmium
Heavy metals in canned tuna from Italian markets, 355
Cajanus cajan
Potential probiotic legume-based product, 265
Calcium
B. cereus and Caco-2 cells, 820
Calcium chloride
Combined inhibitory effect of cassia oil and calcium chloride, 1873
Olive packing in chloride salt mixtures, 1923
Campylobacter
Aerobic *Campylobacter* growth, 685
Characterization of *Campylobacter* from poultry carcasses, 1451
Cost-effectiveness of interventions for *Campylobacter* in poultry, 1161
Food safety in the domestic environment, 482
Temperature effect on *Campylobacter* survival ability, 1726
Campylobacteriosis
Raw milk and campylobacteriosis in Alaska, 744
Campylobacter jejuni
Antimicrobial resistance in *C. jejuni* from chicken carcasses, 691
Foodborne pathogens in raw milk, 1902
Probiotics affect virulence of C. *jejuni*, 1740
Transfer and survival of bacteria during moisture enhancement, 595
Canada
Produce outbreaks in Canada, 173
Protozoan parasites in retail leafy greens, 307
Canned tuna
Heavy metals in canned tuna from Italian markets, 355
Cantaloupes
Model for growth of pathogens in cut melons, 953
Sanitizer treatment for cantaloupes, 1767
Virus removal and transfer during produce scrubbing and peeling, 85
Capillary electrophoresis
Milk proteolysis by *S. aureus*, 1638
Capillary tube method
Thermal inactivation of human norovirus surrogates, 79
Caprylic acid
Cattle hide decontamination by natural compounds, 318
Carbonation
Effects of carbonation, heating, fatty acid esters on *Bacillus* spores, 1568
Carbon monoxide
Consumer acceptance of carbon monoxide packaging, 99
Carboxymethyllysine
Food-derived N_ε-carboxymethyllysine, 912
Carcasses
E. coli on hides, 1250
ESBL-positive *E. coli* from healthy animal surfaces in slaughterhouses, 1773
Salmonella and *E. coli* O157:H7 prevalence in Mexican beef carcasses, 786
Salmonella in pork: the role of slaughtering, 899
Carrot
Virus removal and transfer during produce scrubbing and peeling, 85
Carya illioinensis
Sanitizer treatments of pecans, 770
Case studies
FDA-iRISK—a comparative risk assessment system, 376
Cassia oil
Combined inhibitory effect of cassia oil and calcium chloride, 1873
Caterer
Gastroenteritis outbreak at funerals, 1582
Cattle
Distillers' grains and *E. coli* O157:H7 in cattle, 114
E. coli on hides, 1250
ESBL-positive *E. coli* from healthy animal surfaces in slaughterhouses, 1773
Inactivation of *E. coli* O157:H7 during bovine manure composting, 1308
Salmonella in lymph nodes, 1259
Transdermal *Salmonella* uptake, 1255
Zoonotic *Clostridia* and *Yersinia* in healthy cattle, 1697
Cattle hide
Cattle hide decontamination by natural compounds, 318
Celery
Virus removal and transfer during produce scrubbing and peeling, 85
Cell characteristics
Salmonella biofilm and relationship to cell characteristics, 1784
Cell membrane
Anti–*E. coli* O157:H7 in Canadian prairie forages, 560
Cellulose
Cultivar effects on *E. coli* persistence on spinach, 1829
Cereals
Salmonella Agona outbreak linked again to dry cereal, 227
Ceviche
Vibrio and *Salmonella* inactivation in preparation of ceviche, 1027
Chaetomium funicola
Method for rapid detection of *Chaetomium* spp., 999
Chaetomium globosum
Method for rapid detection of *Chaetomium* spp., 999
Chain length
Antimicrobial activities on rosmarinate esters, 1539
Characteristics
Food-derived N_ε-carboxymethyllysine, 912
Characterization
Purification and characterization of bacteriocin RC 20975, 1575

Cheese
Acid resistance of *L. monocytogenes* during production of Savak cheese, 1801
Cheese ripening
Controlled lytic systems in *L. casei*, 1187
Cherry tomatoes
Combined inhibitory effect of cassia oil and calcium chloride, 1873
Chicken
Chlorine inactivation of *Salmonella* Typhimurium, 1031
Salmonella Enteritidis deposition in eggs, 108
Validation of a predictive model for *Salmonella*, 1035
Chicken carcasses
Characteristics of *S. aureus* from chicken carcasses, 1471
Chicken eggs
Salmonella and *L. monocytogenes* on chicken eggs, 429
Chicken handling policies
Restaurant chicken cross-contamination prevention and cooking, 2141
Chicken handling practices
Restaurant chicken cross-contamination prevention and cooking, 2141
Chicken meat
Listeria subtypes in chicken meat, 129
UV light treatment, 1969
Chicken parts
Contamination of chicken parts with *Salmonella*, 33
Chicken viscera
Arcobacter isolation from chicken viscera, 879
China
Aflatoxin M_1 contamination and dietary risk assessment in China, 849
Antibiotic resistance in aquaculture products from Guangzhou, 295
Chitosan
Antimicrobial coatings for shell eggs against *Salmonella*, 779
Inhibition of *Listeria* in shrimps using chitosan and organic acids, 1377
Chlorhexidine
Biocide susceptibility of *Salmonella* isolates, 653
Chlorine
Chlorine inactivation of *Salmonella* Typhimurium, 1031
Comparing human norovirus surrogates, 139
Interventions for microbial safety of sprouts, 2099
Sanitizer efficacy during leafy green processing, 1838
Chlorine water
Pathogen inactivation in hypochlorite solutions with organic matters, 386
Chlorophyll
Chlorophyll fecal markers, 516
Chouriço de vinho
Biological hazard control during fermented sausage processing, 588
Chromogenic agar medium
Differential medium for non-O157:H7 *E. coli*, 192
Chronobacter sakazakii
Bioluminescent imaging of *C. sakazakii*, 1359
Cinnamon oil
Plant antimicrobials inhibit *Salmonella* Typhimurium in ground pork, 1264
Cinnamon powder
Inhibitory effect of cinnamon, 133
Citrus extracts
Inhibition of yeasts in fruit juices, 1753
Cleaning
Conveyor belt cleaning using ultrasound, 1401
Clean-in-place
Conveyor belt cleaning using ultrasound, 1401
Clean label
Antimicrobial ingredients to control *L. monocytogenes*, 1366
Clinical genotypes
Clinical *C. difficile* genotypes in retailed meats, 348
Clostridium botulinum
Effect of packaging systems on inactivation of spores, 448
High pressure processing on inactivation of *C. botulinum* spores, 1384
Zoonotic *Clostridia* and *Yersinia* in healthy cattle, 1697
Clostridium difficile
C. difficile and MRSA in pork production and processing, 624
C. difficile associated with cattle and ground beef, 256
Clinical *C. difficile* genotypes in retailed meats, 348
Zoonotic *Clostridia* and *Yersinia* in healthy cattle, 1697
Clostridium perfringens
C. perfringens growth in acidified meat and poultry products during chilling, 65
C. perfringens in scombrotoxin-forming fish, 1283
Inhibition of *C. perfringens* by lactate, 1972
Cold chain disruption
Poultry decontaminants and cold chain disruption, 1977
Cold chain management
V. parahaemolyticus cold chain management for Pacific oysters, 1168
Cold-fill
Safety of acidified foods, 1245
Cold holding
Managing risk of cold holding using computer models, 1085
Cold-smoked salmon
Refined liquid smoke decreased *Listeria* in cold-smoked salmon, 812
Coliform counts
Beef carcass sampling areas, 2069
Coliforms
Produce contamination and irrigation water quality, 959
Colorimeter
Control of *Salmonella* and *Listeria* in shrimp, 59
Combined effects
Inhibition of yeasts in fruit juices, 1753
Commensal
Antibiotic resistance in aquaculture products from Guangzhou, 295
Commercial real-time PCR systems
Detection of *stx* subtypes by real-time PCR systems, 871
Comparative MIC analysis
Biocide susceptibility of *Salmonella* isolates, 653
Comparative risk assessment
FDA-iRISK—a comparative risk assessment system, 376
Competitive exclusion
Competitive exclusion of *L. monocytogenes*, 601
Compost
Inactivation of *E. coli* O157:H7 during bovine manure composting, 1308
Pathogen inactivation in manure-based mushroom substrate, 1393
Research protocols for soil amendments of animal origin, 1062
Concentration
Salmonella prevalence and concentration on raw shelled peanuts, 575
Concord
Natural antimicrobials for grape juice, 72
Condensed tannins
Anti–*E. coli* O157:H7 in Canadian prairie forages, 560
Confocal microscopy
Internalization of *Salmonella* during produce washing, 1145
Consumer purchasing decisions
Consumer acceptance of carbon monoxide packaging, 99
Consumers
Food safety knowledge in Norway, 1939
Transfer of MRSA from retail pork, 2087
Contamination
Reduction of *E. coli* O157:H7 and *Salmonella* on harvesting knives, 200
Transfer and survival of bacteria during moisture enhancement, 595
Contamination during preharvest
Localized *Salmonella* internalization in green onion, 568
Contributing factors
Restaurant-associated outbreaks, 1824
Convective PCR
Detection of *Salmonella* by iiPCR, 1322
Conveyor belt
Conveyor belt cleaning using ultrasound, 1401
Cook-in-bag
Effect of product age on survival and growth of *L. monocytogenes*, 1274
Cooking
E. coli O157:H7 in nonintact beef subprimals, 1778
Fate of *E. coli* O157:H7 in mechanically tenderized prime rib, 405
Fate of Shiga toxin–producing *E. coli* in cooked ground beef, 1500
Ground beef handling in restaurants, 2132

Cooling
C. perfringens growth in acidified meat and poultry products during chilling, 65
Inhibition of *C. perfringens* by lactate, 1972
Copper
Antimicrobial tolerance in enterococci, 1806
Corn
Distillers' grains and *E. coli* O157:H7 in cattle, 114
Cost-effectiveness
Cost-effectiveness of interventions for *Campylobacter* in poultry, 1161
Counts
Salmonella and EHEC in raw, shelled runner peanuts, 1668
Cow share
Raw milk and campylobacteriosis in Alaska, 744
Crassostrea virginica
Transplanting to reduce *Vibrio* in oysters, 119
Credible interval
Costs due to illnesses associated with non-O157 STEC, 945
Cronobacter
ILSI NA *Cronobacter* collection, 40
Cronobacter sakazakii
Genetic diversity of *C. sakazakii* isolates, 883
Cross-contamination
Contamination of chicken parts with *Salmonella*, 33
Cross-contamination between produce and common kitchen surfaces, 1530
Food safety in the domestic environment, 482
Tracking cross-contamination in retail delis, 272
Virus removal and transfer during produce scrubbing and peeling, 85
Cryptosporidium
Protozoan parasites in retail leafy greens, 307
Recovery of *Cryptosporidium* and *Giardia* from bivalve mollusks, 93
ctsR
Characterization of *L. monocytogenes*, 1466
CTX-M
Typing and virulence of ESBL-producing *E. coli* O157:H7 strains in Tunisia, 323
Cured turkey
Inhibition of *L. monocytogenes* by propionate, 2074
Curli
Cultivar effects on *E. coli* persistence on spinach, 1829
Cutting boards
Salmonella in butcher shop utensils, 1633
Cyclopiazonic acid
Fungi and mycotoxins in storage Brazil nuts, 1414
Cyclospora
Protozoan parasites in retail leafy greens, 307
Cytotoxicity
Inhibition of cytotoxicity of Shiga toxin by vegetable extracts, 1733

Dairy
Resistance of *Salmonella* from bulk milk and milk filters, 18
Dairy industry
Microbial performance of dairy processing plants, 975
Dairy product
Acid resistance of *L. monocytogenes* during production of Savak cheese, 1801
Database
Food microbe tracker, 283
Data needs
Issues when setting intervention targets with limited data, 360
Data standards
Traceback of blueberries by using novel data sources, 762
Decontamination
Cattle hide decontamination by natural compounds, 318
Decontamination of *B. anthracis* spores, 699
Impact of antimicrobial neutralizers on microbial counts, 328
Interventions for microbial safety of sprouts, 2099
Deli meats
Effect of product age on survival and growth of *L. monocytogenes*, 1274
Detection
Characterization of protozoan parasites in mollusks, 1649
Differential medium for non-O157:H7 *E. coli*, 192
IMBD *Salmonella* and ISO 6579:2002, 657
LAMP detection of *Salmonella* in eggs, 1790
Lateral flow assay for *E. coli* O111, 755
Method for detection of priority STEC, 1689
3M molecular detection system, 874
Di-(2-ethylhexyl) adipate (DEHA)
DEHA in total diet samples, 1985
Diacetate
Listeria inhibition on frankfurters with organic acid powder, 1557
Diarrheagenic *Escherichia coli* pathotypes
Behavior of *E. coli* pathotypes on alfalfa sprouts, 1429
Diarrheagenic *E. coli* pathotypes on tomato, 1621
Dietary estimates
Estimates of dioxins consumed in USDA-regulated products, 1597
Dimethyl dicarbonate
Inactivation of *A. acidoterrestris*, 1041
Dioxins
Estimates of dioxins consumed in USDA-regulated products, 1597
Disability-adjusted life years (DALYs)
Cost-effectiveness of interventions for *Campylobacter* in poultry, 1161
Disinfectants
Biofilm formation and resistance to disinfectant in *L. monocytogenes*, 1179
Decontamination of *B. anthracis* spores, 699
Resistance traits of *E. coli* O157:H7, 6
Disinfection
Efficacy of disinfectants against human noroviruses and surrogates, 1210
Internalization of *Salmonella* during produce washing, 1145
Meta-analysis of norovirus surrogates, 1006
Distillers' grain
Distillers' grains and *E. coli* O157:H7 in cattle, 114
Distribution
Airborne microorganisms in a poultry slaughtering facility, 413
DNA barcoding
FDA "Dirty 22," 144
DNA microarray
Characteristics of *S. aureus* from chicken carcasses, 1471
Domestic hygiene
Food safety in the domestic environment, 482
Dry food
Foodborne pathogens in low–water activity foods, 150
Dual-species biofilm formation
Mixed biofilms by *E. coli* and *Salmonella* Typhimurium, 1513
Duration over days
Gastroenteritis outbreak at funerals, 1582
D-value
Fate of *E. coli* in wafers of ground beef after heating, 1434
Temperature effect on *Campylobacter* survival ability, 1726
Thermal inactivation of human norovirus surrogates, 79
Thermal tolerance of STEC in beef broth, 1120
Dynamic model
L. monocytogenes on pork skin, 1868

Economically motivated adulteration
Economically motivated adulteration of food, 723
Eggs
Pathogen inactivation in pickled eggs, 1846
Salmonella Enteritidis deposition in eggs, 108
Use of heat and ozone to pasteurize shell eggs, 213
Egg white
Membrane damage to *E. coli* by egg white, 1523
Electrochemiluminescence immunoassay
Concentration of bacteria from produce washes, 1152
Electronic nose
Antimicrobial packaging for meat storage, 52

Electrospray ionization
Organoarsenic detection in mussels by LC/ESI-QTRAP-MS/MS, 1293
Emergent pathogen
Growth of *E. albertii* on raw ground beef, 124
Emerging
Norovirus as a cause of gastroenteritis, 1810
Empirical Bayes
Costs due to illnesses associated with non-O157 STEC, 945
Endocrine disrupting chemicals
Bisphenols in commercial milk, 1590
Engraulis encrasicolus
Anisakid larvae in *E. encrasicolus* from central Italy, 1643
Enrichment broth
Enrichment broth for *Salmonella* recovery, 1963
Enteric foodborne pathogens
Internalization of *Salmonella* during produce washing, 1145
Enterobacter aerogenes
Heat resistance of histamine-producing bacteria in tuna loins, 1608
Enterobacterial repetitive intergenic consensus PCR (ERIC-PCR)
Identification of *V. vulnificus* in seafood and seawater in Malaysia, 1797
Enterobacter sakazakii
ILSI NA *Cronobacter* collection, 40
Enterococci
Antimicrobial tolerance in enterococci, 1806
Enterococcus
Production of tyramine by *E. faecalis* strains, 854
Enterohemorrhagic *Escherichia coli* (EHEC)
Salmonella and EHEC in raw, shelled runner peanuts, 1668
Enterohemorrhagic *Escherichia coli* (EHEC) outbreak
Consumers' reactions to news coverage of the 2011 EHEC outbreak, 473
Enteroinvasive *Escherichia coli* (EIEC)
Behavior of *E. coli* pathotypes on alfalfa sprouts, 1429
Diarrheagenic *E. coli* pathotypes on tomato, 1621
Enteropathogenic *Escherichia coli* (EPEC)
Behavior of *E. coli* pathotypes on alfalfa sprouts, 1429
Diarrheagenic *E. coli* pathotypes on tomato, 1621
Enterotoxigenic *Escherichia coli* (ETEC)
Behavior of *E. coli* pathotypes on alfalfa sprouts, 1429
Diarrheagenic *E. coli* pathotypes on tomato, 1621
Enterotoxigenic *Staphylococcus aureus*
Microbiological quality of Burrata cheese, 1981
Enterotoxin
Modeling the probability of *B. cereus* enterotoxin production, 343
Enumeration
Salmonella prevalence and concentration on raw shelled peanuts, 575
Environmental health
Ground beef handling in restaurants, 2132
Environmental Health Specialists Network (EHS-Net)
Explaining foodborne illness risk, 2124
Environmental sampling
3M molecular detection system, 874
Environmental surface
Norovirus on environmental surfaces, 1421
Environmental testing
Salmonella in butcher shop utensils, 1633
Enzyme-linked immunosorbent assay (ELISA)
E. coli O157 in ground beef from Mexico, 680
Ephestia kuehniella
Mating disruption of Mediterranean flour moth, 456
Epidemiological investigation
Tracing the source of a staphylococcal food poisoning, 2093
Epidemiology
Campylobacter, *Y. enterocolitica*, and *S. enterica* in fattening pigs, 1704
Restaurant-associated outbreaks, 1824
Erysiphe necator
Powdery mildew increases FB_2 and OTA production in grape berries, 2031
Escherichia albertii
Growth of *E. albertii* on raw ground beef, 124
Escherichia coli
Antimicrobial resistance profiles of *E. coli* in broiler chickens, 2045
Antimicrobial-resistant *E. coli* from beef cattle, 394
Cross-contamination between produce and common kitchen surfaces, 1530
E. coli on hides, 1250
Effect of pulsed light on growth and resistance of bacterial strains, 435
ESBL-positive *E. coli* from healthy animal surfaces in slaughterhouses, 1773
Fate of *E. coli* O157:H7 in mechanically tenderized prime rib, 405
Fecal indicator organisms and microbial water quality, 967
Image of *E. coli* on Rainbow agar, 1129
Membrane damage to *E. coli* by egg white, 1523
Plasmids harboring *rmtB-bla*$_{CTX-M}$ in different animals, 2018
Produce contamination and irrigation water quality, 959
Typing and virulence of ESBL-producing *E. coli* O157:H7 strains in Tunisia, 323
Escherichia coli biotype I
Transfer and survival of bacteria during moisture enhancement, 595
Escherichia coli contamination
E. coli contamination of lettuce, 1137
Escherichia coli counts
Beef carcass sampling areas, 2069
Escherichia coli infections
STEC O145 outbreak associated with lettuce, 939
Escherichia coli O26
Rapid detection of *E. coli* O26, 748
Escherichia coli O104:H4
Consumers' reactions to news coverage of the 2011 EHEC outbreak, 473
Escherichia coli O111
Lateral flow assay for *E. coli* O111, 755
Escherichia coli O145
STEC O145 outbreak associated with lettuce, 939
Escherichia coli O157
E. coli O157 in ground beef from Mexico, 680
Primers with 5′ flaps improve the sensitivity of multiplex PCR, 668
STEC O molecular serotyping collaborative study, 867
Escherichia coli O157:H7
Anti–*E. coli* O157:H7 in Canadian prairie forages, 560
Cattle hide decontamination by natural compounds, 318
Cultivar effects on *E. coli* persistence on spinach, 1829
Distillers' grains and *E. coli* O157:H7 in cattle, 114
E. coli on hides, 1250
E. coli O157:H7 in nonintact beef subprimals, 1778
E. coli O157:H7 internalization in cut leafy green shoots, 2052
Fate of *E. coli* in wafers of ground beef after heating, 1434
Fate of Shiga toxin–producing *E. coli* in cooked ground beef, 1500
Impact of antimicrobial neutralizers on microbial counts, 328
Inactivation of *E. coli* O157:H7 during bovine manure composting, 1308
Microbiological quality of tomatoes and peppers from Mexico, 1475
Mixed biofilms by *E. coli* and *Salmonella* Typhimurium, 1513
Pathogen inactivation in hypochlorite solutions with organic matters, 386
Pathogen inactivation in manure-based mushroom substrate, 1393
Reduction of *E. coli* O157:H7 and *Salmonella* on harvesting knives, 200
Resistance traits of *E. coli* O157:H7, 6
Safety of acidified foods, 1245
Safety requirements for USDA ground beef purchase, 523
Salmonella and *E. coli* O157:H7 prevalence in Mexican beef carcasses, 786
Sanitizer efficacy during leafy green processing, 1838
Sublethally injured *E. coli* recovery, 674
Thermal tolerance of STEC in beef broth, 1120
Essential oils
Antioxidant and antifungal properties of essential oils from Spain, 1218
Essential oils to control postharvest rots on stone fruits, 631
Reduction of *Salmonella* biofilms by essential oils and carvacrol, 205
Esters
Antimicrobial activities on rosmarinate esters, 1539
Ethanol
Efficacy of disinfectants against human noroviruses and surrogates, 1210

Evaluation
Detection of *stx* subtypes by real-time PCR systems, 871
Exposure assessment
V. parahaemolyticus cold chain management for Pacific oysters, 1168
Extended parallel processing model
Consumers' reactions to news coverage of the 2011 EHEC outbreak, 473
Extended-spectrum β-lactamase (ESBL)
ESBL-positive *E. coli* from healthy animal surfaces in slaughterhouses, 1773
Extended-spectrum β-lactamase–producing *Salmonella* in the PRC, 2040
Typing and virulence of ESBL-producing *E. coli* O157:H7 strains in Tunisia, 323
Extracellular DNA
Effect of bacteriophage against planktonic and attached cells, 2057
Extracellular polymeric substances (EPS)
Biofilm formation and resistance to disinfectant in *L. monocytogenes*, 1179
Extraneous material
FDA "Dirty 22," 144

F2365
L. monocytogenes F2365 σ^B-dependent stress response, 2079
Fall armyworm
Extracts of *Psychotria* spp. against fall armyworm and maize weevil, 1892
Farm food safety
Food safety on small to medium-sized farms and farmers markets, 1989
Farmers market food safety
Food safety on small to medium-sized farms and farmers markets, 1989
Fatty acid esters
Effects of carbonation, heating, fatty acid esters on *Bacillus* spores, 1568
FDA-iRISK
FDA-iRISK—a comparative risk assessment system, 376
Fecal contamination
Chlorophyll fecal markers, 516
Fecal indicator organisms
Fecal indicator organisms and microbial water quality, 967
Fecal screening
Chlorophyll fecal markers, 516
Federal Ground Beef Purchase Program
Safety requirements for USDA ground beef purchase, 523
Feedlot cattle
Salmonella and *E. coli* O157:H7 prevalence in Mexican beef carcasses, 786
Feline calicivirus
Efficacy of disinfectants against human noroviruses and surrogates, 1210
Thermal inactivation of human norovirus surrogates, 79
Fermented pork sausage
Screening *Lactobacillus* for probiotic use in fermented products, 991
First-order model
Thermal inactivation of human norovirus surrogates, 79
Fish
C. perfringens in scombrotoxin-forming fish, 1283
UV imaging for anisakid larvae, 1288
5′ flap
Primers with 5′ flaps improve the sensitivity of multiplex PCR, 668
5-log reduction
Safety of acidified foods, 1245
Floating
Control of *Salmonella* and *Listeria* in shrimp, 59
Floor drain
Competitive exclusion of *L. monocytogenes*, 601
Flour mills
Mating disruption of Mediterranean flour moth, 456
Flume washing
Sanitizer efficacy during leafy green processing, 1838
Fluorescence
ALP and GGT detection in fluid dairy, 892
Bisphenols in commercial milk, 1590
Chlorophyll fecal markers, 516
Fluorescence microscopy
Salmonella biofilm and relationship to cell characteristics, 1784
Fluorophos
ALP and GGT detection in fluid dairy, 892
Food
Decontamination of *B. anthracis* spores, 699
Food-derived N_ε-carboxymethyllysine, 912
Food safety knowledge, 646
Microbiological safety of refrigerators and dishcloths in Mexico, 984
NoV transfer between gloves, foods, surface, 1202
Presence of *Arcobacter* in food products, 1447
Produce outbreaks in Canada, 173
Food allergen control
Food allergen controls, 302
Food Allergen Labeling and Consumer Protection Act (FALCPA)
FDA food allergen recalls, 1933
Food allergy
FDA food allergen recalls, 1933
Foodborne
Research protocols for soil amendments of animal origin, 1062
Foodborne disease outbreaks
Restaurant-associated outbreaks, 1824
Foodborne diseases
Food safety in the domestic environment, 482
Foodborne illness
FDA "Dirty 22," 144
GIS, food deserts, and food safety, 1615
Microbiological survey on pork carcasses, 1046
Salmonella Agona outbreak linked again to dry cereal, 227
Foodborne illness risk
Explaining foodborne illness risk, 2124
Foodborne outbreak
Tracing the source of a staphylococcal food poisoning, 2093
Foodborne pathogens
Detection of multiple pathogens by PCR-microplate array, 1948
Milk production and processing in Tanzania, 1908
Recovery of *L. monocytogenes*, 1854
Food contact surfaces
Biofilm formation of *S. enterica* serovars, 662
Food deserts
GIS, food deserts, and food safety, 1615
Food establishment
Ill food workers, 2146
Restaurant chicken cross-contamination prevention and cooking, 2141
Food fraud
Economically motivated adulteration of food, 723
Food handler
Frying instructions as a control measure in restaurants, 462
Food handling
Explaining foodborne illness risk, 2124
Restaurant chicken cross-contamination prevention and cooking, 2141
Food handling practices
Food safety knowledge in Norway, 1939
Handling practices of leafy greens, 2126
Food industry
Conveyor belt cleaning using ultrasound, 1401
Norovirus on environmental surfaces, 1421
Food poisoning
Salmonella Agona outbreak linked again to dry cereal, 227
Food processing
Characterization of *L. monocytogenes*, 1466
Food protection
Economically motivated adulteration of food, 723
Food risks
Consumers' reactions to news coverage of the 2011 EHEC outbreak, 473
Food safety
Antibacterial activity of oregano on planktonic and sessile bacteria, 1747
Economically motivated adulteration of food, 723
Explaining foodborne illness risk, 2124
Fate of *E. coli* in wafers of ground beef after heating, 1434

Fate of *E. coli* O157:H7 in mechanically tenderized prime rib, 405
Food allergen controls, 302
Food safety knowledge in Norway, 1939
GIS, food deserts, and food safety, 1615
Handling practices of leafy greens, 2126
Ill food workers, 2146
Inactivation of Tulane virus, 712
Lateral flow assay for *E. coli* O111, 755
Method for determination of NDL-PCBs in fishery products, 1017
Microbiological quality of Burrata cheese, 1981
Microbiological quality of spices, 843
Produce outbreaks in Canada, 173
Restaurant chicken cross-contamination prevention and cooking, 2141
Thermal inactivation of *Salmonella* in almonds, 26
Food safety knowledge
Restaurant chicken cross-contamination prevention and cooking, 2141
Food safety management system
Microbial performance of dairy processing plants, 975
Food safety practices
Food safety on small to medium-sized farms and farmers markets, 1989
Food service
Managing risk of cold holding using computer models, 1085
Food worker beliefs
Ill food workers, 2146
Food workers
Ill food workers, 2146
Restaurant chicken cross-contamination prevention and cooking, 2141
Frankfurter
Listeria inhibition on frankfurters with organic acid powder, 1557
French fries
Frying instructions as a control measure in restaurants, 462
Fresh cantaloupes
Thermal inactivation of *Salmonella* Poona on cantaloupes, 420
Fresh cut
Internalization of *Salmonella* during produce washing, 1145
Model for growth of pathogens in cut melons, 953
Fresh-cut carrot
Quality of carrots and process waters, 1240
Fresh-cut lettuce
Sanitizer efficacy during leafy green processing, 1838
Fresh-cut produce
Native microflora and biofilms, 827
Fresh fruits and vegetables
Bacteriophage and produce wash combination, 1336
Fresh produce
Produce contamination and irrigation water quality, 959
Fresh salmon
Biopreservatives to control *L. monocytogenes* in fresh salmon, 1463
Frozen storage
Validation of a predictive model for *Salmonella*, 1035
Frying instructions
Frying instructions as a control measure in restaurants, 462
Frying loss
Histamine in marlin fillets in a foodborne poisoning, 860
Fumosin
Aspergillus section *Nigri* species in almonds, 702
Functional foods
Potential probiotic legume-based product, 265
Functional ingredient
Oral acute and subchronic toxicity of ALIBIRD, 1226

Gamma-glutamyl transferase
ALP and GGT detection in fluid dairy, 892
Gas chromatography–mass spectrometry (GC-MS)
DEHA in total diet samples, 1985
Gastroenteritis
Lateral flow assay for *E. coli* O111, 755
Norovirus as a cause of gastroenteritis, 1810
Gene expression
Probiotics affect virulence of C. *jejuni*, 1740
Genetic diversity
Listeria subtypes in chicken meat, 129
Presence of *Arcobacter* in food products, 1447
Genotyping
Characteristics of *S. aureus* from chicken carcasses, 1471
Characterization and antibiotic susceptibility of *V. vulnificus*, 2063
Tracing the source of a staphylococcal food poisoning, 2093
Gentamicin
Apramycin resistance of *Salmonella* Typhimurium from pigs, 1443
Gentianales
Extracts of *Psychotria* spp. against fall armyworm and maize weevil, 1892
Geosmin
Antifungal compounds from *P. expansum*, 1879
Germination
Interventions for microbial safety of sprouts, 2099
Giardia
Protozoan parasites in retail leafy greens, 307
Recovery of *Cryptosporidium* and *Giardia* from bivalve mollusks, 93
GIS software
GIS, food deserts, and food safety, 1615
Global Trade Item Number (GTIN)
Traceback of blueberries by using novel data sources, 762
Gloves
NoV transfer between gloves, foods, surface, 1202
Salmonella transfer from gloves and tomatoes, 1342
Glucose concentrations
Influence of glucose concentrations on biofilm of *A. hydrophyla*, 239
Goats
Non-O157 STEC in goats, 1626
Good composite
DEHA in total diet samples, 1985
Grape juice
Natural antimicrobials for grape juice, 72
Grease
Decontamination of *B. anthracis* spores, 699
Green onion
Localized *Salmonella* internalization in green onion, 568
Grenada
Salmonella in blue land crabs, 1270
Ground beef
C. difficile associated with cattle and ground beef, 256
Consumer acceptance of carbon monoxide packaging, 99
E. coli O157 in ground beef from Mexico, 680
Fate of *E. coli* in wafers of ground beef after heating, 1434
Fate of Shiga toxin–producing *E. coli* in cooked ground beef, 1500
Ground beef handling in restaurants, 2132
Growth of *E. albertii* on raw ground beef, 124
Image of *E. coli* on Rainbow agar, 1129
Inactivation of *M. paratuberculosis* in hamburger patties, 1194
Safety requirements for USDA ground beef purchase, 523
Salmonella in retail ground beef, 2004
Ground pork
Plant antimicrobials inhibit *Salmonella* Typhimurium in ground pork, 1264
Ground turkey
Inhibition of *C. perfringens* by lactate, 1972
Growth
C. perfringens growth in acidified meat and poultry products during chilling, 65
Validation of a predictive model for *Salmonella*, 1035
Growth behavior
Effect of pulsed light on growth and resistance of bacterial strains, 435
Growth inhibition
Effects of carbonation, heating, fatty acid esters on *Bacillus* spores, 1568
Inhibition of *C. perfringens* by lactate, 1972
Growth model
Listeria growth model in liquid egg, 1549
Growth potential
Fate of pathogens on RTE vegetables, 888

Growth rate
Model for growth of pathogens in cut melons, 953

Hafnia alvei
Heat resistance of histamine-producing bacteria in tuna loins, 1608
Half-maximal effective concentration
Biofilm formation and resistance to disinfectant in *L. monocytogenes*, 1179
Hamburger patties
Inactivation of *M. paratuberculosis* in hamburger patties, 1194
Handling
Ground beef handling in restaurants, 2132
Virus removal and transfer during produce scrubbing and peeling, 85
Hands
NoV transfer between gloves, foods, surface, 1202
Harvest
Reduction of *E. coli* O157:H7 and *Salmonella* on harvesting knives, 200
Heat
Comparing human norovirus surrogates, 139
Plant antimicrobials inhibit *Salmonella* Typhimurium in ground pork, 1264
Stress tolerance of *V. parahaemolyticus*, 1456
Heat inactivation
Inactivation of *M. paratuberculosis* in hamburger patties, 1194
Thermal inactivation of HPAIV and vNDV in processed egg products, 640
Heating
Effects of carbonation, heating, fatty acid esters on *Bacillus* spores, 1568
Heat resistance
Heat resistance of histamine-producing bacteria in tuna loins, 1608
Heat shock
Sublethally injured *E. coli* recovery, 674
Heavy metals
Heavy metals in canned tuna from Italian markets, 355
HeLa cells
Effect of lactose on ricin toxicity, 2037
Hemolytic uremic syndrome
STEC O145 outbreak associated with lettuce, 939
Hepatitis A virus (HAV)
Virus removal and transfer during produce scrubbing and peeling, 85
Hide
E. coli on hides, 1250
High pressure homogenization
Inactivation of *A. acidoterrestris*, 1041
High pressure processing
Effect of packaging systems on inactivation of spores, 448
High pressure processing on inactivation of *C. botulinum* spores, 1384
High-risk practices
Food safety knowledge in Norway, 1939
Histamine
C. perfringens in scombrotoxin-forming fish, 1283
Histamine in marlin fillets in a foodborne poisoning, 860
Histamine-forming bacteria
Histamine in marlin fillets in a foodborne poisoning, 860
Histamine-producing bacteria
Heat resistance of histamine-producing bacteria in tuna loins, 1608
Honeydew melon
Virus removal and transfer during produce scrubbing and peeling, 85
Humectants
Characterization of *Salmonella* from low-moisture environments, 1488
Hydrophilic-lipophilic balance (HLB)
Antimicrobial activities on rosmarinate esters, 1539
4-Hydroxybenzyl isothiocyanate (4-HBITC)
White mustard essential oil effect on *Salmonella*, 580
Hygiene
Microbial performance of dairy processing plants, 975
Hygiene indicator
Broiler carcass sampling methods, 1330
Hygienic quality
Quality of carrots and process waters, 1240

Identification
Method for rapid detection of *Chaetomium* spp., 999
Ill food worker
Ill food workers, 2146
Immunochromatography
Rapid detection of *E. coli* O26, 748
Immunomagnetic separation
Rapid detection of norovirus using IMS and QDs, 707
Inactivation
Chlorine inactivation of *Salmonella* Typhimurium, 1031
Effect of packaging systems on inactivation of spores, 448
Effects of carbonation, heating, fatty acid esters on *Bacillus* spores, 1568
High pressure processing on inactivation of *C. botulinum* spores, 1384
Inactivation of Tulane virus, 712
Indicator
Listeria in seafood processing plants, 1279
Individual knowledge
Consumer acceptance of carbon monoxide packaging, 99
Infant milk formula
Bioluminescent imaging of *C. sakazakii*, 1359
Infected berry
Powdery mildew increases FB_2 and OTA production in grape berries, 2031
Infectious disease outbreaks
Salmonella Agona outbreak linked again to dry cereal, 227
Inhibition
Listeria inhibition on frankfurters with organic acid powder, 1557
Initial contamination
Contamination of chicken parts with *Salmonella*, 33
Inoculation
Distillers' grains and *E. coli* O157:H7 in cattle, 114
Inactivation of *P. digitatum* and *P. italicum* using UV-C, 1761
Insulated isothermal PCR
Detection of *Salmonella* by iiPCR, 1322
Internalization
E. coli O157:H7 internalization in cut leafy green shoots, 2052
Interventions
Cost-effectiveness of interventions for *Campylobacter* in poultry, 1161
Invasion
B. cereus and Caco-2 cells, 820
In vitro digestion
Cross-protection to gastric stress in *Salmonella*, 333
In vitro model
Persistence of *T. gondii* tissue cysts, 1056
Irradiation
Ground beef handling in restaurants, 2132
Irrigation water
Produce contamination and irrigation water quality, 959
ISO 6579:2002
IMBD *Salmonella* and ISO 6579:2002, 657
Isolate collection
ILSI NA *Cronobacter* collection, 40
Isolation
Differential medium for non-O157:H7 *E. coli*, 192
Presence of *Arcobacter* in food products, 1447
Isolation and characterization
C. difficile associated with cattle and ground beef, 256
Isothermal amplification
3M molecular detection system, 874
Isothermal amplification and bioluminescence detection of DNA
IMBD *Salmonella* and ISO 6579:2002, 657
Italy
Anisakid larvae in *E. encrasicolus* from central Italy, 1643

Juices
Inhibition of yeasts in fruit juices, 1753

Kinetic model
Pressure–thermal inactivation of *B. cereus* spores in cooked rice, 616

Kinetics
Thermal inactivation of *Salmonella* in almonds, 26
Kitchen
Virus removal and transfer during produce scrubbing and peeling, 85
Kitchen utensil
Virus removal and transfer during produce scrubbing and peeling, 85
Knife
Reduction of *E. coli* O157:H7 and *Salmonella* on harvesting knives, 200
Knowledge
Food safety knowledge, 646
Microbiological safety of refrigerators and dishcloths in Mexico, 984

Lactate
Inhibition of *C. perfringens* by lactate, 1972
Listeria inhibition on frankfurters with organic acid powder, 1557
Lactate-diacetate
Effect of product age on survival and growth of *L. monocytogenes*, 1274
Lactic acid
E. coli O157:H7 in nonintact beef subprimals, 1778
Lactobacillus acidophilus
Potential probiotic legume-based product, 265
Probiotics affect virulence of C. *jejuni*, 1740
Lactobacillus casei
Controlled lytic systems in *L. casei*, 1187
Potential probiotic legume-based product, 265
Lactobacillus plantarum
Screening *Lactobacillus* for probiotic use in fermented products, 991
Lactobacillus rhamnosus
Purification and characterization of bacteriocin RC 20975, 1575
Lactose
Effect of lactose on ricin toxicity, 2037
Lairage
Salmonella in pork: the role of slaughtering, 899
Lateral flow assay
Lateral flow assay for *E. coli* O111, 755
Lauric arginate ester
Antimicrobial coatings for shell eggs against *Salmonella*, 779
LC/ESI-MS/MS
Organoarsenic detection in mussels by LC/ESI-QTRAP-MS/MS, 1293
Lead
Heavy metals in canned tuna from Italian markets, 355
Leaf topography
Cultivar effects on *E. coli* persistence on spinach, 1829
Leafy greens
E. coli O157:H7 internalization in cut leafy green shoots, 2052
Handling practices of leafy greens, 2126
Protozoan parasites in retail leafy greens, 307
Legume-based products
Potential probiotic legume-based product, 265
Lethality
Fate of *E. coli* in wafers of ground beef after heating, 1434
Lettuce
E. coli O157:H7 internalization in cut leafy green shoots, 2052
Rapid detection of norovirus using IMS and QDs, 707
Levulinic acid
Sanitizer treatment for cantaloupes, 1767
Lime juice
Vibrio and *Salmonella* inactivation in preparation of ceviche, 1027
Lineage
Characterization of *L. monocytogenes*, 1466
Liquid chromatography
Bisphenols in commercial milk, 1590
Organoarsenic detection in mussels by LC/ESI-QTRAP-MS/MS, 1293
Liquid egg
Listeria growth model in liquid egg, 1549
Liquid medium
Temperature effect on *Campylobacter* survival ability, 1726
Listeria
Control of *Salmonella* and *Listeria* in shrimp, 59
Effect of pulsed light on growth and resistance of bacterial strains, 435
Listeria growth model in liquid egg, 1549
Milk production and processing in Tanzania, 1908
Pathogen inactivation in manure-based mushroom substrate, 1393
Listeria innocua
Refined liquid smoke decreased *Listeria* in cold-smoked salmon, 812
Listeria monocytogenes
Acid resistance of *L. monocytogenes* during production of Savak cheese, 1801
Antimicrobial ingredients to control *L. monocytogenes*, 1366
Biofilm formation and resistance to disinfectant in *L. monocytogenes*, 1179
Biological hazard control during fermented sausage processing, 588
Biopreservatives to control *L. monocytogenes* in fresh salmon, 1463
Characterization of *L. monocytogenes*, 1466
Competitive exclusion of *L. monocytogenes*, 601
Effect of product age on survival and growth of *L. monocytogenes*, 1274
Fate of pathogens on RTE vegetables, 888
FDA-iRISK—a comparative risk assessment system, 376
Foodborne pathogens in raw milk, 1902
Incidence of *Listeria* in a mushroom production facility, 608
Inhibition of *Listeria* in shrimps using chitosan and organic acids, 1377
Inhibition of *L. monocytogenes* by propionate, 2074
Listeria inhibition on frankfurters with organic acid powder, 1557
Listeria in seafood processing plants, 1279
Listeria subtypes in chicken meat, 129
L. monocytogenes F2365 σ^B-dependent stress response, 2079
L. monocytogenes from pigs and environmental samples at slaughterhouse, 1863
L. monocytogenes on pork skin, 1868
L. monocytogenes prevalence in bovine colostrum, 248
Molecular subtyping and persistence in smoked fish plants, 796
Safety of acidified foods, 1245
Salmonella and *L. monocytogenes* on chicken eggs, 429
UV light treatment, 1969
Listeria species identification
Incidence of *Listeria* in a mushroom production facility, 608
Listeria spp.
Listeria in seafood processing plants, 1279
3M molecular detection system, 874
Locally grown produce
Food safety on small to medium-sized farms and farmers markets, 1989
Log reduction
Issues when setting intervention targets with limited data, 360
Longitutidnal
C. difficile and MRSA in pork production and processing, 624
Loop-mediated isothermal amplification (LAMP)
LAMP detection of *Salmonella* in eggs, 1790
Lotting
Safety requirements for USDA ground beef purchase, 523
Low a_w food
Foodborne pathogens in low–water activity foods, 150
Low moisture
Characterization of *Salmonella* from low-moisture environments, 1488
Cross-protection to gastric stress in *Salmonella*, 333
Thermal inactivation of *Salmonella* in almonds, 26
Low-moisture food
Foodborne pathogens in low–water activity foods, 150
Issues when setting intervention targets with limited data, 360
Low sodium
Listeria inhibition on frankfurters with organic acid powder, 1557
Low water activity
Cross-protection to gastric stress in *Salmonella*, 333
Luminex
STEC O molecular serotyping collaborative study, 867
Lymph node
Salmonella in lymph nodes, 1259
Transdermal *Salmonella* uptake, 1255
Lysozyme
Effect of modified lysozyme on shelf life of pork, 338

Maize weevil
Extracts of *Psychotria* spp. against fall armyworm and maize weevil, 1892
Major food allergens
Food allergen controls, 302
Manure
E. coli contamination of lettuce, 1137
Research protocols for soil amendments of animal origin, 1062
Marine bivalve mollusks
Characterization of protozoan parasites in mollusks, 1649
Marketing
Salmonella Agona outbreak linked again to dry cereal, 227
Mastitis
Milk proteolysis by *S. aureus*, 1638
Mathematical modeling
Managing risk of cold holding using computer models, 1085
Mating disruption
Mating disruption of Mediterranean flour moth, 456
Meal preparation
Contamination of chicken parts with *Salmonella*, 33
Meat
Clinical *C. difficile* genotypes in retailed meats, 348
Effect of modified lysozyme on shelf life of pork, 338
Estimates of dioxins consumed in USDA-regulated products, 1597
IMBD *Salmonella* and ISO 6579:2002, 657
Path-dependent thermal inactivation model, 220
Temperature effect on *Campylobacter* survival ability, 1726
Meat freshness
Meat freshness identification with artificial intelligence, 1916
Meat products
C. perfringens growth in acidified meat and poultry products during chilling, 65
Meat spoilage
Antimicrobial packaging for meat storage, 52
Mechanical tenderization
Fate of *E. coli* O157:H7 in mechanically tenderized prime rib, 405
Media coverage
Consumer acceptance of carbon monoxide packaging, 99
Melon
Model for growth of pathogens in cut melons, 953
Membrane damage
Membrane damage to *E. coli* by egg white, 1523
Mentha spicata
Effect of plant extracts on sardine fillets quality, 1719
Mercury
Heavy metals in canned tuna from Italian markets, 355
Meta-analysis
Meta-analysis of norovirus surrogates, 1006
Temperature effect on *Campylobacter* survival ability, 1726
Metal speciation
Organoarsenic detection in mussels by LC/ESI-QTRAP-MS/MS, 1293
Methicillin-resistant *Staphylococcus aureus* (MRSA)
C. difficile and MRSA in pork production and processing, 624
Methicillin-resistant *S. aureus* in pork production chain, 1095
Transfer of MRSA from retail pork, 2087
Methods
Characterization of protozoan parasites in mollusks, 1649
3-Methylphenol
Stored food mite and *O. praeteritum*, 1887
Mexico
Salmonella and *E. coli* O157:H7 prevalence in Mexican beef carcasses, 786
Mexico City
Y. enterocolitica in raw cow's milk, Mexico City, 694
Microarray
L. monocytogenes F2365 σ^B-dependent stress response, 2079
Microbead
STEC O molecular serotyping collaborative study, 867
Microbial assessment scheme
Microbial performance of dairy processing plants, 975
Microbial competition
Recovery of *L. monocytogenes*, 1854
Microbial growth
Internalization of *Salmonella* during produce washing, 1145
Microbial safety level profiles
Microbial performance of dairy processing plants, 975
Microbial stability
Predicting mold spoilage of food products, 538
Microbiological baseline survey
Microbiological survey on pork carcasses, 1046
Microbiological contamination
Recalls of foods due to microbiological contamination, 932
Microbiological quality
Microbiological quality of spices, 843
Microbiological quality of tomatoes and peppers from Mexico, 1475
Produce contamination and irrigation water quality, 959
Risk factors for contamination of ready-to-serve sandwiches, 231
Microbiological safety
Screening *Lactobacillus* for probiotic use in fermented products, 991
Microbiota of seafood for fish
Antimicrobial-resistant bacteria in raw frozen seafood, 490
Microorganism
Airborne microorganisms in a poultry slaughtering facility, 413
Microstructure of ascospore
Method for rapid detection of *Chaetomium* spp., 999
Milk
Aflatoxin M_1 contamination and dietary risk assessment in China, 849
ALP and GGT detection in fluid dairy, 892
Bisphenols in commercial milk, 1590
Effect of lactose on ricin toxicity, 2037
Milk production and processing in Tanzania, 1908
Milk protein
Milk proteolysis by *S. aureus*, 1638
Minimally processed
Internalization of *Salmonella* during produce washing, 1145
Modeling
Model for growth of pathogens in cut melons, 953
Path-dependent thermal inactivation model, 220
Mode of action
Purification and characterization of bacteriocin RC 20975, 1575
Modification
Effect of modified lysozyme on shelf life of pork, 338
Modified atmosphere packaging
Consumer acceptance of carbon monoxide packaging, 99
Moisture enhancement
Transfer and survival of bacteria during moisture enhancement, 595
Mold growth
Predicting mold spoilage of food products, 538
Molecular
STEC O molecular serotyping collaborative study, 867
Molecular epidemiology
L. monocytogenes prevalence in bovine colostrum, 248
Molecular mechanisms
Characterization of *Campylobacter* from poultry carcasses, 1451
Molecular pathogen detection
Detection of multiple pathogens by PCR-microplate array, 1948
Molecular subtype
Food microbe tracker, 283
Molecular subtyping and persistence in smoked fish plants, 796
Monilinia laxa
Essential oils to control postharvest rots on stone fruits, 631
Monitoring
Foodborne pathogens in raw milk, 1902
Monte Carlo simulation
Aflatoxin M_1 contamination and dietary risk assessment in China, 849
FDA-iRISK—a comparative risk assessment system, 376
Listeria growth model in liquid egg, 1549
V. parahaemolyticus cold chain management for Pacific oysters, 1168
Morganella morganii
Heat resistance of histamine-producing bacteria in tuna loins, 1608

Most probable number (MPN)
IMBD *Salmonella* and ISO 6579:2002, 657
Prevalence and MPN of *Salmonella* in retail chicken, 1958
Salmonella and EHEC in raw, shelled runner peanuts, 1668
Multidrug resistance
Antimicrobial resistance of cattle- and human-associated *Salmonella*, 1676
Multilocus sequence typing (MLST)
Genetic diversity of *C. sakazakii* isolates, 883
Typing and virulence of ESBL-producing *E. coli* O157:H7 strains in Tunisia, 323
Multilocus variable number tandem repeat analysis
Characterization of *L. monocytogenes*, 1466
Multiple-locus variable-number tandem repeat analysis (MLVA)
Characterization and antibiotic susceptibility of *V. vulnificus*, 2063
Multiplex PCR
Incidence of *Listeria* in a mushroom production facility, 608
L. monocytogenes from pigs and environmental samples at slaughterhouse, 1863
Multiplex PCR detection
Primers with 5′ flaps improve the sensitivity of multiplex PCR, 668
Multi-virulence-locus sequence typing (MVLST)
Incidence of *Listeria* in a mushroom production facility, 608
Murine norovirus
Comparing human norovirus surrogates, 139
Efficacy of disinfectants against human noroviruses and surrogates, 1210
Thermal inactivation of human norovirus surrogates, 79
Virus removal and transfer during produce scrubbing and peeling, 85
Muscle cysts
Persistence of *T. gondii* tissue cysts, 1056
Mushroom
Pathogen inactivation in manure-based mushroom substrate, 1393
Mushroom production
Incidence of *Listeria* in a mushroom production facility, 608
Mussels
Organoarsenic detection in mussels by LC/ESI-QTRAP-MS/MS, 1293
Recovery of *Cryptosporidium* and *Giardia* from bivalve mollusks, 93
Mycobacterium paratuberculosis
Inactivation of *M. paratuberculosis* in hamburger patties, 1194
Mycoflora
Fungi and mycotoxins in storage Brazil nuts, 1414
Mycotoxin
Powdery mildew increases FB_2 and OTA production in grape berries, 2031

Nanodispersion
Antimicrobial properties of nanodispersed thymol, 440
National Advisory Committee on Microbiological Criteria for Foods (NACMCF)
Safety requirements for USDA ground beef purchase, 523
Native microflora
Native microflora and biofilms, 827
Natto
Dynamics of radioactive cesium during processing of soybean, 1021
Natural antimicrobials
Natural antimicrobials for grape juice, 72
Natural ingredients
Antimicrobial ingredients to control *L. monocytogenes*, 1366
Nested PCR
Salmonella and *L. monocytogenes* on chicken eggs, 429
Neutralizer
Impact of antimicrobial neutralizers on microbial counts, 328
Newcastle disease virus
Thermal inactivation of HPAIV and vNDV in processed egg products, 640
Niagara
Natural antimicrobials for grape juice, 72
NICE (nisin-controlled expression) system
Controlled lytic systems in *L. casei*, 1187
Nimame
Dynamics of radioactive cesium during processing of soybean, 1021
Nisin
Antimicrobial coatings for shell eggs against *Salmonella*, 779
Antimicrobial packaging for meat storage, 52
Nonintact
E. coli O157:H7 in nonintact beef subprimals, 1778
Nonintact beef
Fate of *E. coli* O157:H7 in mechanically tenderized prime rib, 405
Non-O157
Non-O157 STEC in goats, 1626
STEC O molecular serotyping collaborative study, 867
Non-O157 STEC
Differential medium for non-O157:H7 *E. coli*, 192
Pathogen inactivation in hypochlorite solutions with organic matters, 386
STEC O145 outbreak associated with lettuce, 939
Thermal tolerance of STEC in beef broth, 1120
Nonstarter lactic acid bacteria (NSLAB)
Controlled lytic systems in *L. casei*, 1187
Nonthermal inactivation
Temperature effect on *Campylobacter* survival ability, 1726
Norovirus
Efficacy of disinfectants against human noroviruses and surrogates, 1210
Inactivation of Tulane virus, 712
Meta-analysis of norovirus surrogates, 1006
Norovirus bioaccumulation in oysters, 505
Norovirus on environmental surfaces, 1421
NoV transfer between gloves, foods, surface, 1202
Rapid detection of norovirus using IMS and QDs, 707
Virus removal and transfer during produce scrubbing and peeling, 85
Nut
Sanitizer treatments of pecans, 770

O104:H4
Fate of *E. coli* in wafers of ground beef after heating, 1434
O-antigen serotyping
Genetic diversity of *C. sakazakii* isolates, 883
Occurrence
Zoonotic *Clostridia* and *Yersinia* in healthy cattle, 1697
Ochratoxin
Aspergillus section *Nigri* species in almonds, 702
Olive extract
Plant antimicrobials inhibit *Salmonella* Typhimurium in ground pork, 1264
Oral acute toxicity
Oral acute and subchronic toxicity of ALIBIRD, 1226
Oral dose
Salmonella Enteritidis deposition in eggs, 108
Oral subchronic toxicity
Oral acute and subchronic toxicity of ALIBIRD, 1226
Orange juice
A. acidoterrestris resistance to sanitizers, 1408
Oranges
Impact of antimicrobial neutralizers on microbial counts, 328
Inactivation of *P. digitatum* and *P. italicum* using UV-C, 1761
Oregano oil
Plant antimicrobials inhibit *Salmonella* Typhimurium in ground pork, 1264
Organic acids
Aerobic *Campylobacter* growth, 685
Inhibition of *Listeria* in shrimps using chitosan and organic acids, 1377
Resistance traits of *E. coli* O157:H7, 6
Organic lettuce
E. coli contamination of lettuce, 1137
Organic loads
Pathogen inactivation in hypochlorite solutions with organic matters, 386
Organoarsenic
Organoarsenic detection in mussels by LC/ESI-QTRAP-MS/MS, 1293
Osmolality
Stress tolerance of *V. parahaemolyticus*, 1456

Ostericum praeteritum
Stored food mite and *O. praeteritum*, 1887
Outbreak investigation
Traceback of blueberries by using novel data sources, 762
Outbreaks
Gastroenteritis outbreak at funerals, 1582
Norovirus as a cause of gastroenteritis, 1810
Produce outbreaks in Canada, 173
STEC O145 outbreak associated with lettuce, 939
Oxidative stress
Powdery mildew increases FB_2 and OTA production in grape berries, 2031
Oysters
Norovirus bioaccumulation in oysters, 505
Recovery of *Cryptosporidium* and *Giardia* from bivalve mollusks, 93
Transplanting to reduce *Vibrio* in oysters, 119
Ozone
Use of heat and ozone to pasteurize shell eggs, 213

Packaging
Fate of pathogens on RTE vegetables, 888
Packaging systems
Effect of packaging systems on inactivation of spores, 448
Packing
Olive packing in chloride salt mixtures, 1923
Para-κ-casein
Milk proteolysis by *S. aureus*, 1638
Parasexual recombination
Heterokaryon self-incompatible *A. flavus* nonaflatoxigenic isolates, 1051
Parasite
Produce outbreaks in Canada, 173
Pasteurization
ALP and GGT detection in fluid dairy, 892
Raw milk and campylobacteriosis in Alaska, 744
Thermal inactivation of HPAIV and vNDV in processed egg products, 640
Use of heat and ozone to pasteurize shell eggs, 213
Pathogen
Effect of bacteriophage against planktonic and attached cells, 2057
Fate of *E. coli* in wafers of ground beef after heating, 1434
Fate of *E. coli* O157:H7 in mechanically tenderized prime rib, 405
Pathogen detection
Image of *E. coli* on Rainbow agar, 1129
Pathogen growth
Managing risk of cold holding using computer models, 1085
Pathogenic bacteria
Poultry decontaminants and temperature of application, 833
Pathogenicity
Characterization of spoilage bacteria, 1350
Pathogens
FDA "Dirty 22," 144
Inhibitory effect of cinnamon, 133
Interventions for microbial safety of sprouts, 2099
Path-dependent thermal inactivation model, 220
Pathogen inactivation in pickled eggs, 1846
Research protocols for soil amendments of animal origin, 1062
PCR
Identification of *V. vulnificus* in seafood and seawater in Malaysia, 1797
LAMP detection of *Salmonella* in eggs, 1790
Method for rapid detection of *Chaetomium* spp., 999
PCR detection of *Salmonella* during seed sprouting, 314
Recovery of *L. monocytogenes*, 1854
PCR-microplate
Detection of multiple pathogens by PCR-microplate array, 1948
PCR sensitivity
Primers with 5′ flaps improve the sensitivity of multiplex PCR, 668
Peanut butter
Cross-protection to gastric stress in *Salmonella*, 333
Salmonella and EHEC in raw, shelled runner peanuts, 1668
Peanuts
Salmonella and EHEC in raw, shelled runner peanuts, 1668
Salmonella prevalence and concentration on raw shelled peanuts, 575
Pecan
Sanitizer treatments of pecans, 770
Penicillium digitatum
Inactivation of *P. digitatum* and *P. italicum* using UV-C, 1761
Penicillium expansum
Antifungal compounds from *P. expansum*, 1879
Penicillium italicum
Inactivation of *P. digitatum* and *P. italicum* using UV-C, 1761
Pepper
Microbiological quality of tomatoes and peppers from Mexico, 1475
Peracetic acid resistance
Method for rapid detection of *Chaetomium* spp., 999
Perforated film
Fate of pathogens on RTE vegetables, 888
Peroxyacetic acid
Sanitizer efficacy during leafy green processing, 1838
Persistence
Cultivar effects on *E. coli* persistence on spinach, 1829
Molecular subtyping and persistence in smoked fish plants, 796
Pesticides
Pathogenic bacteria control by pesticides, 719
Pesticide decontamination of produce, 510
Petrifilms
Fecal indicator organisms and microbial water quality, 967
pH
Antimicrobial properties of nanodispersed thymol, 440
Comparing human norovirus surrogates, 139
Modeling the probability of *B. cereus* enterotoxin production, 343
Phenethyl alcohol
Antifungal compounds from *P. expansum*, 1879
Phenolipids
Antimicrobial activities on rosmarinate esters, 1539
Pheromones
Mating disruption of Mediterranean flour moth, 456
Phosphorylated lipids
B. cereus and Caco-2 cells, 820
Photobacterium damselae
Heat resistance of histamine-producing bacteria in tuna loins, 1608
Physical removal
Virus removal and transfer during produce scrubbing and peeling, 85
Pickled
Pathogen inactivation in pickled eggs, 1846
Pigeon pea
Potential probiotic legume-based product, 265
Pigs
Apramycin resistance of *Salmonella* Typhimurium from pigs, 1443
C. difficile and MRSA in pork production and processing, 624
ESBL-positive *E. coli* from healthy animal surfaces in slaughterhouses, 1773
Methicillin-resistant *S. aureus* in pork production chain, 1095
Pig slaughter
Methicillin-resistant *S. aureus* in pork production chain, 1095
Pink coloration
Control of *Salmonella* and *Listeria* in shrimp, 59
Planktonic cell
Effect of bacteriophage against planktonic and attached cells, 2057
Plant antimicrobials
Plant antimicrobials inhibit *Salmonella* Typhimurium in ground pork, 1264
Plant cell wall–degrading enzyme
Characterization of spoilage bacteria, 1350
Plasmids
Plasmids harboring *rmtB*-bla_{CTX-M} in different animals, 2018
Typing and virulence of ESBL-producing *E. coli* O157:H7 strains in Tunisia, 323
Polychlorinated biphenyls
Method for determination of NDL-PCBs in fishery products, 1017

Polylactic acid
Antimicrobial coatings for shell eggs against *Salmonella*, 779
Pork
C. difficile and MRSA in pork production and processing, 624
Methicillin-resistant *S. aureus* in pork production chain, 1095
Salmonella in pork: the role of slaughtering, 899
Transfer of MRSA from retail pork, 2087
Pork carcass
Microbiological survey on pork carcasses, 1046
Pork skin
L. monocytogenes on pork skin, 1868
Postharvest
Essential oils to control postharvest rots on stone fruits, 631
Postharvest diseases
Antifungal compounds from *P. expansum*, 1879
Combined inhibitory effect of cassia oil and calcium chloride, 1873
Postharvest process
Transplanting to reduce *Vibrio* in oysters, 119
Potassium chloride
Olive packing in chloride salt mixtures, 1923
Poultry
Antimicrobial resistance of *Salmonella* serovars in poultry in Brazil, 2011
Cost-effectiveness of interventions for *Campylobacter* in poultry, 1161
Estimates of dioxins consumed in USDA-regulated products, 1597
Path-dependent thermal inactivation model, 220
Quinolone residues in poultry meat, 352
Poultry carcasses
Characterization of *Campylobacter* from poultry carcasses, 1451
Poultry decontaminants
Poultry decontaminants and temperature of application, 833
Poultry decontamination treatments
Poultry decontaminants and cold chain disruption, 1977
Poultry meat
Antimicrobial resistance in *C. jejuni* from chicken carcasses, 691
Poultry slaughtering
Airborne microorganisms in a poultry slaughtering facility, 413
Powder
Listeria inhibition on frankfurters with organic acid powder, 1557
Powdered infant formula production facility
Genetic diversity of *C. sakazakii* isolates, 883
Predictive microbiology
Path-dependent thermal inactivation model, 220
Predicting mold spoilage of food products, 538
Predictive model
Validation of a predictive model for *Salmonella*, 1035
Preservatives
Natural antimicrobials for grape juice, 72
Pressure-assisted thermal process
Pressure–thermal inactivation of *B. cereus* spores in cooked rice, 616
Pressure fluids
Effect of packaging systems on inactivation of spores, 448
Prevalence
Campylobacter, *Y. enterocolitica*, and *S. enterica* in fattening pigs, 1704
L. monocytogenes from pigs and environmental samples at slaughterhouse, 1863
Milk production and processing in Tanzania, 1908
Prevalence and MPN of *Salmonella* in retail chicken, 1958
Salmonella and *E. coli* O157:H7 prevalence in Mexican beef carcasses, 786
Salmonella and EHEC in raw, shelled runner peanuts, 1668
Salmonella prevalence and concentration on raw shelled peanuts, 575
Previous history
Validation of a predictive model for *Salmonella*, 1035
Priority serogroups O26, O45, O103, O111, O121, O145, and O157
Method for detection of priority STEC, 1689
Probabilistic model
L. monocytogenes on pork skin, 1868
Predicting mold spoilage of food products, 538
Probabilistic modeling
V. parahaemolyticus cold chain management for Pacific oysters, 1168
Probability model
Modeling the probability of *B. cereus* enterotoxin production, 343
Probiotic
Potential probiotic legume-based product, 265
Screening *Lactobacillus* for probiotic use in fermented products, 991
Processed egg products
Thermal inactivation of HPAIV and vNDV in processed egg products, 640
Processing
Internalization of *Salmonella* during produce washing, 1145
Processing factor
Dynamics of radioactive cesium during processing of soybean, 1021
Processing foods
Dynamics of radioactive cesium during processing of soybean, 1021
Processing plant
Native microflora and biofilms, 827
Process water
Quality of carrots and process waters, 1240
Produce
Cross-contamination between produce and common kitchen surfaces, 1530
Handling practices of leafy greens, 2126
Microbiological quality of tomatoes and peppers from Mexico, 1475
Pesticide decontamination of produce, 510
Produce outbreaks in Canada, 173
Research protocols for soil amendments of animal origin, 1062
Produce wash
Bacteriophage and produce wash combination, 1336
Concentration of bacteria from produce washes, 1152
Produce washing
Virus removal and transfer during produce scrubbing and peeling, 85
Product age
Effect of product age on survival and growth of *L. monocytogenes*, 1274
Propionic acid
Inhibition of *L. monocytogenes* by propionate, 2074
Prosopis alba
Inhibition of cytotoxicity of Shiga toxin by vegetable extracts, 1733
Protein synthesis
Effect of lactose on ricin toxicity, 2037
Proteolysis
Milk proteolysis by *S. aureus*, 1638
Protozoan parasites
Characterization of protozoan parasites in mollusks, 1649
Pseudomonas aeruginosa
Antibacterial activity of oregano on planktonic and sessile bacteria, 1747
Pseudomonas fluorescens
Molecular characterization of *P. fluorescens*, 500
Psychrotrophic microorganisms
Poultry decontaminants and cold chain disruption, 1977
Pulsed-field gel electrophoresis (PFGE)
Arcobacter spp. from Finnish raw milk, 1630
Genetic diversity of *C. sakazakii* isolates, 883
L. monocytogenes from pigs and environmental samples at slaughterhouse, 1863
Molecular characterization of *P. fluorescens*, 500
Salmonella Agona outbreak linked again to dry cereal, 227
Salmonella and EHEC in raw, shelled runner peanuts, 1668
Pulsed light
Effect of pulsed light on growth and resistance of bacterial strains, 435
PulseNet
Salmonella Agona outbreak linked again to dry cereal, 227
Purple prairie clover
Anti–*E. coli* O157:H7 in Canadian prairie forages, 560

Quality
Effect of plant extracts on sardine fillets quality, 1719
Quantitative real-time PCR (qRT-PCR)
Inactivation of Tulane virus, 712

Quantitative risk assessment
FDA-iRISK—a comparative risk assessment system, 376
Quantum-behaved particle swarm optimization
Meat freshness identification with artificial intelligence, 1916
Quantum dot
Rapid detection of norovirus using IMS and QDs, 707
Quinolones
Quinolone residues in poultry meat, 352
Quorum sensing
Characterization of spoilage bacteria, 1350
Influence of glucose concentrations on biofilm of *A. hydrophyla*, 239

Radiation resistance
Radiation resistance of *E. coli* and *Salmonella*, 1438
Radioactive cesium
Dynamics of radioactive cesium during processing of soybean, 1021
Raoultella planticola
Heat resistance of histamine-producing bacteria in tuna loins, 1608
Rapid detection
Detection of *Salmonella* by iiPCR, 1322
Rapid detection of *E. coli* O26, 748
Ratio estimator
Costs due to illnesses associated with non-O157 STEC, 945
Rats
Oral acute and subchronic toxicity of ALIBIRD, 1226
Raw cow's milk
Y. enterocolitica in raw cow's milk, Mexico City, 694
Raw duck wings
Enrichment broth for *Salmonella* recovery, 1963
Raw frozen fish and shrimp
Antimicrobial-resistant bacteria in raw frozen seafood, 490
Raw milk
Arcobacter spp. from Finnish raw milk, 1630
Foodborne pathogens in raw milk, 1902
Raw milk and campylobacteriosis in Alaska, 744
Resistance of *Salmonella* from bulk milk and milk filters, 18
Ready-to-eat
Fate of pathogens on RTE vegetables, 888
Tracking cross-contamination in retail delis, 272
Ready-to-eat meat
Inhibition of *L. monocytogenes* by propionate, 2074
Ready-to-serve sandwiches
Risk factors for contamination of ready-to-serve sandwiches, 231
Real-time PCR
C. perfringens in scombrotoxin-forming fish, 1283
Recalls
FDA food allergen recalls, 1933
Recalls of foods due to microbiological contamination, 932
Recovery
Recovery of *Cryptosporidium* and *Giardia* from bivalve mollusks, 93
Sublethally injured *E. coli* recovery, 674
Reduction
Pesticide decontamination of produce, 510
Refined liquid smoke
Refined liquid smoke decreased *Listeria* in cold-smoked salmon, 812
Refrigeration
Inhibition of *Listeria* in shrimps using chitosan and organic acids, 1377
Refrigerator
Microbiological safety of refrigerators and dishcloths in Mexico, 984
Regulatory microbiology
Recovery of *L. monocytogenes*, 1854
Repeated exposure
Norovirus bioaccumulation in oysters, 505
Repellency
Extracts of *Psychotria* spp. against fall armyworm and maize weevil, 1892
Repetitive extragenic palindromic PCR (REP-PCR)
Identification of *V. vulnificus* in seafood and seawater in Malaysia, 1797
Residues
Quinolone residues in poultry meat, 352
Resistance
Antimicrobial resistance in *C. jejuni* from chicken carcasses, 691
Antimicrobial tolerance in enterococci, 1806
Effect of pulsed light on growth and resistance of bacterial strains, 435
Salmonella in butcher shop utensils, 1633
Resistance gene
Antimicrobial-resistant *E. coli* from beef cattle, 394
Restaurants
Explaining foodborne illness risk, 2124
Frying instructions as a control measure in restaurants, 462
Ground beef handling in restaurants, 2132
Handling practices of leafy greens, 2126
Ill food workers, 2146
Restaurant-associated outbreaks, 1824
Restaurant chicken cross-contamination prevention and cooking, 2141
Retail
Contamination of chicken parts with *Salmonella*, 33
Managing risk of cold holding using computer models, 1085
Retail chicken
Extended-spectrum β-lactamase–producing *Salmonella* in the PRC, 2040
Prevalence and MPN of *Salmonella* in retail chicken, 1958
Retail deli
Tracking cross-contamination in retail delis, 272
Reveal
E. coli O157 in ground beef from Mexico, 680
Reverse transcription PCR
Rapid detection of norovirus using IMS and QDs, 707
Ribotype
Molecular subtyping and persistence in smoked fish plants, 796
Rice
Pressure–thermal inactivation of *B. cereus* spores in cooked rice, 616
Rice cake
Inhibitory effect of cinnamon, 133
Ricin
Effect of lactose on ricin toxicity, 2037
Ripening
Acid resistance of *L. monocytogenes* during production of Savak cheese, 1801
Risk assessment
Aflatoxin M_1 contamination and dietary risk assessment in China, 849
Managing risk of cold holding using computer models, 1085
Persistence of *T. gondii* tissue cysts, 1056
Risk communication
Consumers' reactions to news coverage of the 2011 EHEC outbreak, 473
Risk factor
Risk factors for contamination of ready-to-serve sandwiches, 231
Risk management
Managing risk of cold holding using computer models, 1085
Risk modeling
Issues when setting intervention targets with limited data, 360
Risk ranking
FDA-iRISK—a comparative risk assessment system, 376
Rosmarinic acid
Antimicrobial activities on rosmarinate esters, 1539

Safety
Food safety knowledge, 646
Interventions for microbial safety of sprouts, 2099
Microbiological safety of refrigerators and dishcloths in Mexico, 984
Research protocols for soil amendments of animal origin, 1062
Safety requirements
Safety requirements for USDA ground beef purchase, 523
Salmonella
Antimicrobial coatings for shell eggs against *Salmonella*, 779
Antimicrobial resistance of *Salmonella* serovars in poultry in Brazil, 2011
Broiler carcass sampling methods, 1330
Characterization of *Salmonella* from low-moisture environments, 1488
Contamination of chicken parts with *Salmonella*, 33
Control of *Salmonella* and *Listeria* in shrimp, 59

Cross-contamination between produce and common kitchen surfaces, 1530
Cross-protection to gastric stress in *Salmonella*, 333
Detection of *Salmonella* by iiPCR, 1322
Extended-spectrum β-lactamase–producing *Salmonella* in the PRC, 2040
Fate of pathogens on RTE vegetables, 888
FDA-iRISK—a comparative risk assessment system, 376
Foodborne pathogens in raw milk, 1902
IMBD *Salmonella* and ISO 6579:2002, 657
Impact of antimicrobial neutralizers on microbial counts, 328
Issues when setting intervention targets with limited data, 360
LAMP detection of *Salmonella* in eggs, 1790
Microbiological quality of tomatoes and peppers from Mexico, 1475
Milk production and processing in Tanzania, 1908
Model for growth of pathogens in cut melons, 953
Pathogen inactivation in hypochlorite solutions with organic matters, 386
Pathogen inactivation in manure-based mushroom substrate, 1393
PCR detection of *Salmonella* during seed sprouting, 314
Prevalence and MPN of *Salmonella* in retail chicken, 1958
Primers with 5′ flaps improve the sensitivity of multiplex PCR, 668
Radiation resistance of *E. coli* and *Salmonella*, 1438
Reduction of *E. coli* O157:H7 and *Salmonella* on harvesting knives, 200
Reduction of *Salmonella* biofilms by essential oils and carvacrol, 205
Resistance of *Salmonella* from bulk milk and milk filters, 18
Safety requirements for USDA ground beef purchase, 523
Salmonella Agona outbreak linked again to dry cereal, 227
Salmonella and *E. coli* O157:H7 prevalence in Mexican beef carcasses, 786
Salmonella and EHEC in raw, shelled runner peanuts, 1668
Salmonella and *L. monocytogenes* on chicken eggs, 429
Salmonella biofilm and relationship to cell characteristics, 1784
Salmonella in blue land crabs, 1270
Salmonella in butcher shop utensils, 1633
Salmonella in lymph nodes, 1259
Salmonella in pork: the role of slaughtering, 899
Salmonella in retail ground beef, 2004
Salmonella prevalence and concentration on raw shelled peanuts, 575
Salmonella transfer from gloves and tomatoes, 1342
Sanitizer treatment for cantaloupes, 1767
Sanitizer treatments of pecans, 770
Thermal inactivation of *Salmonella* in almonds, 26
Traceback of blueberries by using novel data sources, 762
Transdermal *Salmonella* uptake, 1255
Use of heat and ozone to pasteurize shell eggs, 213
Validation of a predictive model for *Salmonella*, 1035
Vibrio and *Salmonella* inactivation in preparation of ceviche, 1027
White mustard essential oil effect on *Salmonella*, 580
Salmonella Agona SAGOXB.0066
Biofilm formation of *S. enterica* serovars, 662
Salmonella enterica
Biofilm formation of *S. enterica* serovars, 662
Pathogenic bacteria control by pesticides, 719
Safety of acidified foods, 1245
Salmonella enterica serotype Typhimurium
Internalization of *Salmonella* during produce washing, 1145
Transfer and survival of bacteria during moisture enhancement, 595
Salmonella Enteritidis
Biofilm formation of *S. enterica* serovars, 662
Salmonella Enteritidis deposition in eggs, 108
Salmonella internalization
Localized *Salmonella* internalization in green onion, 568
Salmonella Poona
Thermal inactivation of *Salmonella* Poona on cantaloupes, 420
Salmonella spp.
Antimicrobial resistance of cattle- and human-associated *Salmonella*, 1676
Biological hazard control during fermented sausage processing, 588
Salmonella Typhimurium
Apramycin resistance of *Salmonella* Typhimurium from pigs, 1443
Biofilm formation of *S. enterica* serovars, 662
Chlorine inactivation of *Salmonella* Typhimurium, 1031
Enrichment broth for *Salmonella* recovery, 1963
Mixed biofilms by *E. coli* and *Salmonella* Typhimurium, 1513
Salmonella Typhimurium DT104
Plant antimicrobials inhibit *Salmonella* Typhimurium in ground pork, 1264
Sample area
Beef carcass sampling areas, 2069
Sampling method
Broiler carcass sampling methods, 1330
Sampling plans
Safety requirements for USDA ground beef purchase, 523
Sanitation
Reduction of *E. coli* O157:H7 and *Salmonella* on harvesting knives, 200
Sanitation evaluation
Risk factors for contamination of ready-to-serve sandwiches, 231
Sanitization
Native microflora and biofilms, 827
Sanitizer
A. acidoterrestris resistance to sanitizers, 1408
Sanitizer treatments of pecans, 770
Sardine
Effect of plant extracts on sardine fillets quality, 1719
Scombroid poisoning
Histamine in marlin fillets in a foodborne poisoning, 860
Seafood
Identification of *V. vulnificus* in seafood and seawater in Malaysia, 1797
Listeria in seafood processing plants, 1279
Method for determination of NDL-PCBs in fishery products, 1017
Predictive model for *V. parahaemolyticus* inactivation in shrimps, 1712
Seawater
Identification of *V. vulnificus* in seafood and seawater in Malaysia, 1797
Seeds
Interventions for microbial safety of sprouts, 2099
Selective agar overlay
Sublethally injured *E. coli* recovery, 674
Semisolid media
Aerobic *Campylobacter* growth, 685
Serotype
Salmonella biofilm and relationship to cell characteristics, 1784
STEC O molecular serotyping collaborative study, 867
Serovars
Antimicrobial resistance of *Salmonella* serovars in poultry in Brazil, 2011
Shedding
Distillers' grains and *E. coli* O157:H7 in cattle, 114
Shelf life
Effect of plant extracts on sardine fillets quality, 1719
Natural antimicrobials for grape juice, 72
Shelf-life modeling
Predicting mold spoilage of food products, 538
Shelf stable
Pathogen inactivation in pickled eggs, 1846
Shelf-stability
Pressure–thermal inactivation of *B. cereus* spores in cooked rice, 616
Shell egg
Antimicrobial coatings for shell eggs against *Salmonella*, 779
LAMP detection of *Salmonella* in eggs, 1790
Shellfish
Norovirus bioaccumulation in oysters, 505
V. parahaemolyticus cold chain management for Pacific oysters, 1168
Shiga-like toxin–producing *Escherichia coli* (STEC)
E. coli O157 in ground beef from Mexico, 680
Shiga toxin
Fate of *E. coli* in wafers of ground beef after heating, 1434
Fate of *E. coli* O157:H7 in mechanically tenderized prime rib, 405
Fate of Shiga toxin–producing *E. coli* in cooked ground beef, 1500
Inhibition of cytotoxicity of Shiga toxin by vegetable extracts, 1733
Shiga toxin gene subtypes
Detection of *stx* subtypes by real-time PCR systems, 871

Shiga toxin–producing *Escherichia coli* (STEC)
Behavior of *E. coli* pathotypes on alfalfa sprouts, 1429
Diarrheagenic *E. coli* pathotypes on tomato, 1621
Fate of *E. coli* in wafers of ground beef after heating, 1434
Fate of Shiga toxin–producing *E. coli* in cooked ground beef, 1500
Method for detection of priority STEC, 1689
Non-O157 STEC in goats, 1626
STEC O molecular serotyping collaborative study, 867
STEC O145 outbreak associated with lettuce, 939
Rapid detection of *E. coli* O26, 748
Shiga toxin–producing *Escherichia coli* (STEC) detection
Detection of *stx* subtypes by real-time PCR systems, 871
Shiga toxin–producing *Escherichia coli* (STEC) non-O157
Image of *E. coli* on Rainbow agar, 1129
Shrimp
Characterization and antibiotic susceptibility of *V. vulnificus*, 2063
Control of *Salmonella* and *Listeria* in shrimp, 59
Inhibition of *Listeria* in shrimps using chitosan and organic acids, 1377
Predictive model for *V. parahaemolyticus* inactivation in shrimps, 1712
Signaling
B. cereus and Caco-2 cells, 820
Simultaneous occurrence
Campylobacter, *Y. enterocolitica*, and *S. enterica* in fattening pigs, 1704
16S rRNA methylases
Plasmids harboring *rmtB*-$bla_{CTX\text{-}M}$ in different animals, 2018
Skip-lot
Safety requirements for USDA ground beef purchase, 523
Slaughterhouses
Salmonella in pork: the role of slaughtering, 899
Smoked fish
Molecular subtyping and persistence in smoked fish plants, 796
Smoked salmon
Biopreservatives to control *L. monocytogenes* in fresh salmon, 1463
Sodium chloride
Olive packing in chloride salt mixtures, 1923
Sodium dodecyl sulfate
Sanitizer treatment for cantaloupes, 1767
Sodium hypochlorite
Efficacy of disinfectants against human noroviruses and surrogates, 1210
Sodium nitrite
Antimicrobial ingredients to control *L. monocytogenes*, 1366
Sodium propionate
Inhibition of *L. monocytogenes* by propionate, 2074
Sodium tripolyphosphate
Control of *Salmonella* and *Listeria* in shrimp, 59
Soil
Research protocols for soil amendments of animal origin, 1062
Solanum lycopericum
Diarrheagenic *E. coli* pathotypes on tomato, 1621
Sonication
Pesticide decontamination of produce, 510
Soybean
Dynamics of radioactive cesium during processing of soybean, 1021
Spatial analysis
GIS, food deserts, and food safety, 1615
spa typing
Characteristics of *S. aureus* from chicken carcasses, 1471
Species identification
FDA "Dirty 22," 144
Spices
Microbiological quality of spices, 843
Spinach
Cultivar effects on *E. coli* persistence on spinach, 1829
E. coli O157:H7 internalization in cut leafy green shoots, 2052
Spoilage
Brettanomyces affected by SO_2 and temperature, 2024
Spoilage bacteria
Characterization of spoilage bacteria, 1350
Poultry decontaminants and temperature of application, 833
Spores
A. acidoterrestris resistance to sanitizers, 1408
C. perfringens growth in acidified meat and poultry products during chilling, 65
Decontamination of *B. anthracis* spores, 699
Effect of packaging systems on inactivation of spores, 448
High pressure processing on inactivation of *C. botulinum* spores, 1384
Sprouts
Interventions for microbial safety of sprouts, 2099
SRP vaccine
Salmonella in lymph nodes, 1259
ST398
Methicillin-resistant *S. aureus* in pork production chain, 1095
Staphylococcus aureus
Antibacterial activity of oregano on planktonic and sessile bacteria, 1747
Biological hazard control during fermented sausage processing, 588
Characteristics of *S. aureus* from chicken carcasses, 1471
Safety requirements for USDA ground beef purchase, 523
Tracing the source of a staphylococcal food poisoning, 2093
Transfer of MRSA from retail pork, 2087
Staphylococcus carnosus
Antimicrobial activities on rosmarinate esters, 1539
Stem scar
Sanitizer treatment for cantaloupes, 1767
Storage
Plant antimicrobials inhibit *Salmonella* Typhimurium in ground pork, 1264
Stress resistance
Characterization of *L. monocytogenes*, 1466
Stress response
L. monocytogenes F2365 σ^B-dependent stress response, 2079
Stress tolerance
Stress tolerance of *V. parahaemolyticus*, 1456
Striped marlin
Histamine in marlin fillets in a foodborne poisoning, 860
Subtyping
Food microbe tracker, 283
Sulfur dioxide
Brettanomyces affected by SO_2 and temperature, 2024
Support vector machine
Meat freshness identification with artificial intelligence, 1916
Surface
Cross-contamination between produce and common kitchen surfaces, 1530
NoV transfer between gloves, foods, surface, 1202
Surface pasteurization
Thermal inactivation of *Salmonella* Poona on cantaloupes, 420
Surrogates
Inactivation of Tulane virus, 712
Meta-analysis of norovirus surrogates, 1006
Survey
Food safety knowledge, 646
Food safety knowledge in Norway, 1939
Microbiological safety of refrigerators and dishcloths in Mexico, 984
Survival
Characterization of *Salmonella* from low-moisture environments, 1488
Persistence of *T. gondii* tissue cysts, 1056
Validation of a predictive model for *Salmonella*, 1035
Susceptibility
Resistance traits of *E. coli* O157:H7, 6
Swab
Norovirus on environmental surfaces, 1421
Swine
Campylobacter, *Y. enterocolitica*, and *S. enterica* in fattening pigs, 1704
Swine slaughterhouse
L. monocytogenes from pigs and environmental samples at slaughterhouse, 1863
Synthetic gastric fluid
Acid resistance of *L. monocytogenes* during production of Savak cheese, 1801

Table olives
Olive packing in chloride salt mixtures, 1923

Tandem mass spectrometry
Organoarsenic detection in mussels by LC/ESI-QTRAP-MS/MS, 1293
Tanzania, Africa
Milk production and processing in Tanzania, 1908
t_D value
Thermal inactivation of human norovirus surrogates, 79
Temperature
Antimicrobial properties of nanodispersed thymol, 440
Modeling the probability of *B. cereus* enterotoxin production, 343
Temperature change
E. coli on hides, 1250
Temperature of application
Poultry decontaminants and temperature of application, 833
Testing
Safety requirements for USDA ground beef purchase, 523
The Big Six
Fate of *E. coli* in wafers of ground beef after heating, 1434
Fate of Shiga toxin–producing *E. coli* in cooked ground beef, 1500
Thermal inactivation
Fate of *E. coli* in wafers of ground beef after heating, 1434
Fate of *E. coli* O157:H7 in mechanically tenderized prime rib, 405
Fate of Shiga toxin–producing *E. coli* in cooked ground beef, 1500
Path-dependent thermal inactivation model, 220
Thermal inactivation of human norovirus surrogates, 79
Thermal inactivation of *Salmonella* in almonds, 26
Thermal injury
Path-dependent thermal inactivation model, 220
Thermal process
Pressure–thermal inactivation of *B. cereus* spores in cooked rice, 616
Thermal tolerance
Thermal tolerance of STEC in beef broth, 1120
Thermoultrasound inactivation
Predictive model for *V. parahaemolyticus* inactivation in shrimps, 1712
Thymol
Antimicrobial properties of nanodispersed thymol, 440
Tilapia
Vibrio and *Salmonella* inactivation in preparation of ceviche, 1027
Tofu
Dynamics of radioactive cesium during processing of soybean, 1021
Tomatoes
Diarrheagenic *E. coli* pathotypes on tomato, 1621
Fecal indicator organisms and microbial water quality, 967
Microbiological quality of tomatoes and peppers from Mexico, 1475
Pesticide decontamination of produce, 510
Salmonella transfer from gloves and tomatoes, 1342
Total diet
DEHA in total diet samples, 1985
Toxicity
Extracts of *Psychotria* spp. against fall armyworm and maize weevil, 1892
Traceability
Traceback of blueberries by using novel data sources, 762
Traceback
Traceback of blueberries by using novel data sources, 762
Transdermal
Transdermal *Salmonella* uptake, 1255
Transfer
NoV transfer between gloves, foods, surface, 1202
Transfer of MRSA from retail pork, 2087
Virus removal and transfer during produce scrubbing and peeling, 85
Transplanting
Transplanting to reduce *Vibrio* in oysters, 119
Tree nut
Sanitizer treatments of pecans, 770
Triclosan
Biocide susceptibility of *Salmonella* isolates, 653
Triple quadrupole
Organoarsenic detection in mussels by LC/ESI-QTRAP-MS/MS, 1293
Tulane virus
Comparing human norovirus surrogates, 139
Inactivation of Tulane virus, 712
Tuna loins
Heat resistance of histamine-producing bacteria in tuna loins, 1608
Tyramine
Production of tyramine by *E. faecalis* strains, 854
Tyrophagus putrescentiae
Stored food mite and *O. praeteritum*, 1887
Tyrosine decarboxylase gene
Production of tyramine by *E. faecalis* strains, 854

U73122
B. cereus and Caco-2 cells, 820
Ultrasound
Conveyor belt cleaning using ultrasound, 1401
Uncured turkey
Inhibition of *C. perfringens* by lactate, 1972
Universal Product Code (UPC)
Traceback of blueberries by using novel data sources, 762
U.S. Department of Agriculture (USDA)
Safety requirements for USDA ground beef purchase, 523
U.S. Department of Agriculture, Food Safety and Inspection Service (FSIS) method MLG 5.05
E. coli O157 in ground beef from Mexico, 680
U.S. Food and Drug Administration (FDA)
Recalls of foods due to microbiological contamination, 932
Utensils
Salmonella in butcher shop utensils, 1633
UV-C
Inactivation of *P. digitatum* and *P. italicum* using UV-C, 1761
UV flourescent imaging
UV imaging for anisakid larvae, 1288
UV light
UV light treatment, 1969

Vacuum pack
Effect of plant extracts on sardine fillets quality, 1719
Validation
Validation of a predictive model for *Salmonella*, 1035
Vegetative compatibility group
Heterokaryon self-incompatible *A. flavus* nonaflatoxigenic isolates, 1051
Vegetative fusion
Heterokaryon self-incompatible *A. flavus* nonaflatoxigenic isolates, 1051
Verocytotoxin-producing *E. coli* O157:H7
Foodborne pathogens in raw milk, 1902
Verotoxigenic *Escherichia coli*
Radiation resistance of *E. coli* and *Salmonella*, 1438
Viability
Characterization of protozoan parasites in mollusks, 1649
Viable-but-not-culturable
Brettanomyces affected by SO_2 and temperature, 2024
Vibrio
Vibrio and *Salmonella* inactivation in preparation of ceviche, 1027
Vibrio parahaemolyticus
Predictive model for *V. parahaemolyticus* inactivation in shrimps, 1712
Stress tolerance of *V. parahaemolyticus*, 1456
Transplanting to reduce *Vibrio* in oysters, 119
Vibrio vulnificus
Characterization and antibiotic susceptibility of *V. vulnificus*, 2063
Identification of *V. vulnificus* in seafood and seawater in Malaysia, 1797
Transplanting to reduce *Vibrio* in oysters, 119
Viral gastroenteritis
Gastroenteritis outbreak at funerals, 1582
Virulence
Influence of glucose concentrations on biofilm of *A. hydrophyla*, 239
Typing and virulence of ESBL-producing *E. coli* O157:H7 strains in Tunisia, 323
Virulence attenuation
Listeria subtypes in chicken meat, 129
Virus
Produce outbreaks in Canada, 173
